the complete composite solution

independent and fully supported

With strong support built from close relationships with major suppliers of insulated panelling, complementary products and ancillaries, ISD can offer unbiased, independent advice to clients, un-paralleled by any competitor.

ISD also maintain close partnering links and strong relationships with main building contractors and major refrigeration companies. Building partnerships with professionals who specialise in food, distribution, storage and production, ensures the best service to end-users within the UK or Europe.

accredited cold store contractor

ISD is committed to continuous improvement and achieving the highest levels of accreditation in the cold store construction market sector. We invest in high quality training and development for our valued staff to ensure awareness and compliance with the latest statutory and legal requirements.

ISD are a member of IACSC (International Association for Cold Storage Construction) and adhere to, and are fully compliant with, the build method contained within the latest published design guide published by them in June 2008.

Overall, ISD projects stand out by their delivery to programme (often accelerated) without compromise on quality or Health and Safety, ensuring complete customer satisfaction.

we hold the following memberships and accreditations:

Member of IACSC - International Association for Cold Storage Construction – a trade body in the UK which actively encourages and promotes best practice in design and build of cold store facilities.

Loss Prevention Certification Board – approved service provider for fire protection. LPS 1500 and 1531 – define the requirements for companies installing fire resisting compartment systems and passive protection products approved by LPCB.

Investors in People Bronze Award

Achilles BuildingConfidence

the UK's leading specialist in cold store construction

experienced and specialist

In the commercial temperature controlled market sector, ISD Coldstores Division has meticulously built and maintains its position as the UK's leading specialist in cold store construction.

Predominately working in the UK we also undertake work across Europe and Africa and the client is involved in all aspects of the project.

complete service offering

With a full range of design, installation and manufacturing services, ISD provides the complete solution for the installation of temperature controlled envelopes at distribution centres for major UK supermarket chains, food supply logistics, food manufacturing companies and many other organisations involved in food processing and packaging.

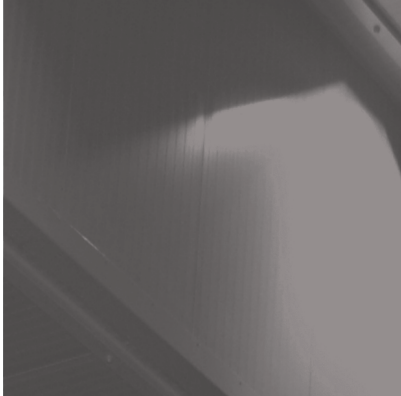

Early involvement, from design right through to practical completion, often working to tight work programmes, allows ISD to bring its years of experience and wide skill base to projects. This ensures that main contractors immediately benefit from greater cost and timing efficiencies.

how isd work

ISD Design Teams work closely with Architects/Consultants/Specifiers and main contractors, to offer advice based on vast experience in this field often resulting in cost reduced programme delivery benefits.

The ISD Coldstores Division is able to offer the widest variety of temperature-controlled hygienic environments to suit the client's needs.

- / internal insulated 'box-within-a-box' wall and ceiling panel systems that provide thermal, fire safe, hygienic and airtight barriers for cold and chill storage from -40 deg to +12deg C
- / internal insulated 'box-within-a-box' wall and ceiling system, for hygienic food processing and production facilities
- / internal insulated wall system, for partitioning areas of differing use and fire risk
- / single envelope external cladding

"95% of our business is from referrals and previous satisfied customers which is a testament to our integrity, professionalism and focus to deliver a quality product without compromising quality"

"ISD work collaboratively with developers, architects, project managers and quantity surveyors to ensure clients receive a high quality and cost effective end product"

We actively seek early involvement in projects to maximise benefits to the client.

ISD has vast experience in designing and building coldstores, distribution centres and food processing facilities.

We provide accurate, detailed information and tender documents.

Presented in a user friendly format, the net cost effect of any changes to the specification are readily accommodated and visible.
