

independent and fully supported

With strong support built from close relationships with major suppliers and manufacturers of waterproofing products, complimentary products and ancillaries, ISD can offer unbiased, independent advice to clients, unparalleled in the market.

- / ISD maintains close links and strong relationships with main building contractors and specifiers.
- / Such an extensive network of professional partnerships ensures the best service to end-users in both the UK and Europe.

accredited specialist contractor

ISD is committed to continuous improvement and has achieved the highest levels of accreditation in the construction market sectors in which we operate. We invest in high quality development and training for our valued staff to ensure awareness and compliance with the latest statutory and legal requirements.

Overall, ISD projects stand out because of their (often accelerated) delivery to programme without compromising in quality or Health and Safety, ensuring complete customer satisfaction.

isd hold the following memberships and accreditations:

The National Federation of Roofing Contractors actively ensures that members offer high standards of workmanship and sound business practice through a strict code of practice and independent vetting procedure, including site inspections and adhering to the Government-endorsed TrustMark standards.

Altius assessment provides assurance that a business is sound, with all the necessary health and safety systems, insurance coverage, and other requirements in place to provide high levels of competency and quality.

Safecontractor is the fastest growing health and safety accreditation scheme in the UK, with more than 200 major clients and over 18,000 contractor members.

industrial waterproofing

Independent advice – lasting solutions

designed by www.snapmarketing.co.uk

end to end waterproofing solutions

Specifiers are faced with increasingly challenging environments when protecting buildings and other structures against water and damp ingress. ISD Industrial Waterproofing Division delivers practical solutions, providing clients with unparalleled design and installation expertise that leverages ISD's existing high quality resources.

Taking care of clients' waterproofing strategy from start to finish, ISD are able to provide technical advice and guidance, from in-house drawing and design, to site services and ongoing support.

comprehensive and integrated

The new range of structural waterproofing options offered by ISD Solutions can be implemented as a fully integrated solution, or operated alongside other specialist contractors.

ISD Industrial Waterproofing Division offers the widest variety of technical solutions to suit a client's needs. This could be for a bridge deck, a car park or an inner city brown roof. Solutions include:-

- / Mastic Asphalt - offers 100% waterproof integrity for projects such as industrial roofing, bridge decks and tanking. Mastic asphalt also provides a tough surface for paved areas and flooring.
- / Hot Melt Waterproofing - ideal to meet the market demand for cost effective roofs that fulfil multiple purposes; plant installation, public amenity, access, and even storage. Hot melt has a track record of longevity and performance.
- / Liquid Roofing Systems – perfect where heat cannot be applied, where full access is a problem or the deck is an awkward shape. Here, liquid-applied waterproofing systems can provide the answer to difficult roofing projects.
- / Single-Ply Roofing Systems - offer a cost effective solution, with the capability for rapid construction, together with high thermal performance and flexibility in roof design.
- / Built-up Felt Roofing - arguably the most economic flat roofs, using bituminous membranes, for the widest variety of applications.

“ISD work collaboratively with main contractors, architects, project managers and specialist trades to ensure that clients receive the highest quality and most cost-effective solution.”

“A structural waterproofing solution utilising hot melt offers the perfect blend of performance, ease of application and cost efficiency to provide a long lasting substrate that is ideal for many environmental applications such as green and brown roofs that use recycled materials as ballast.”

“ISD offer totally independent advice, a comprehensive breadth of industrial surfacing and waterproofing options encompassing not only the traditional single ply systems, but also more specialist systems such as mastic asphalt and green roofing.”

10

reasons to choose isd waterproofing

- 1/ completely independent and unbiased advice
- 2/ in-house health and safety manager ensures a job specific approach
- 3/ customer focused and financially robust company
- 4/ high specification, fast track installation and quality without compromise
- 5/ completely integrated solution or standalone service
- 6/ widest range of waterproofing solutions on offer
